## RITE AID: STOP SIGN RELOCATION

eciService relocated a "Do Not Enter" sign for a Rite Aid in West Chester, Pennsylvania.

Before, tree limbs obstructed the sign, and it was determined that trimming the trees would not make the sign visible enough. The Rite Aid Store Manager proposed relocating the sign to an island in front of the drive-thru exit. To achieve this, Ralph Brown procured a new 4' breakaway post and hardware and then installed the breakaway post deep into the ground in the island. The existing 8' sign post and "Do Not Enter" sign were then attached to the new breakaway and new hardware.

The "Do Not Enter" sign is now securely installed in a highly-visible area.

## PYRAMID HEALTH

The Pyramid Healthcare York project is a 20,300 square-foot addition to their Inpatient Treatment Center. This slab on grade, wood frame addition will add approximately 42 additional beds for patients. Additionally, there will be new dining areas, fitness rooms, rec areas, counseling offices, and staff rooms. The exterior of the building will receive a masonry veneer as well. A large underground water retention system will be installed under the new parking lot to handle storm water requirements. The project includes minor work to their existing building, such as new roofing and façade work.
